- Graduated with 90.38 Weighted Average Mark

Work Experience

ConceptX, Yangon, Myanmar

Frontend Web Developer

(Aug – Nov 2019)

- Worked with a team with 2 other designers to improve the UI and aesthetics of a learning management platform
- Developed and proposed various designs in an efficient manner within a strict time frame

Freelance, Yangon, Myanmar

Freelance Tutor

(Oct 2016 – Mar 2017)

- Helped with note-taking and developed a study plan to increase productivity and enhance time management for 3 high school students
- Mentored and motivated students to help them achieve top grades for all subjects covered – Science, Information Technology and Math

Mellowdy

- A web application for designed for Desktop usage to explore your music taste efficiently in a short time span by listening to 30 second clips
- Powered by the Spotify API with the ability to add to playlists and library
- Improved my ReactJS, Redux, API implementation and design skills creating the app from scratch

Personal Website

- A personal website made with ReactJS, CSS grid and flexbox to showcase my other projects
- Implemented responsiveness using a mobile first design approach to enhance user experience in all kinds of devices

Custom Portfolio Design

- A simple and clean portfolio design to test my design and UI skills
- Learned HTML, CSS and Javascript by experimenting different interfaces and designs
